## ABOUT ME

---

**Short Description** Full Stack and Data Science Enthusiast, with a strong passion in learning Web related technologies; easy to communicate with, and a great team leader and player. Dependable and trained to work in high-stress environments, seeking to leverage creativity and analytical thinking to help your company with its upcoming challenges.

**Technical Skills** Git/GitHub, React/Reactstrap/Material-UI, React-Native, HTML(5), CSS(3)/LESS/SASS, JavaScript, NodeJS/Express, Bootstrap, Materialize, Python/TensorFlow, Java/JavaFX, MySQL, NoSQL.

**Languages** English, Conversational Proficiency in Sinhala, Conversational Proficiency in Tamil.

**Interests** Web Design, Full-stack Development, AI and Data Science enthusiast.

**Portfolio** <https://development-portfolio-382f4.firebaseio.com/>

## PERSONAL PROJECTS

---

### Covid-19 Live World Tracker

(June 2020 – July 2020)

<https://covid-graph-tracker.firebaseio.com/>

- Wrote a covid-19 tracker, using React, ChartJS, LeafletJS, Google Maps and External API's.
- Acquired code organization skills by modularization and using ES6+ syntax
- Deepened understanding in React functional and class components, hooks and lifecycle methods.
- Learnt how API's, libraries and Firebase hosting are used.

### Trailerz Hub

(July 2020 – August 2020)

<https://trailerz-hub-101.firebaseio.com/>

- Wrote a movie trailer streaming app using React, React axios and movie API's.
- Learnt how to implement requests to API's using React axios.

### Hit-Me-Up

(August 2020 – September 2020)

<http://hitmeup-e7a8d.firebaseio.com/>

- Wrote an aesthetic messaging app, using Slack as an inspiration, using React, Context API, and firebase User Authentication.
- Deepened understanding in React functional and class components, hooks and lifecycle methods.
- Learnt how to validate users, using Firebase Google Authentication.
- Used external React API's.

## Personal Portfolio Blog

(June 2020 – current)

<https://mysterious-escarpment-41897.herokuapp.com/>

- Wrote a Personal Blogging Application with CRUD and admin login functionality, using JavaScript, NodeJS, Firebase and Heroku.
- Learnt how to implement CRUD functionality using NodeJS, building a REST API.
- Learnt hosting via Heroku.
- Learnt how to validate admin access (to be able to add/ update/ delete a post) with custom Username and Password using Firebase Authentication.
- Learnt how various Node modules are used.

## Dummyzon, an Amazon Product Showcase + price tracker

(July 2020 – August 2020)

<https://dummyzon-c93d1.firebaseio.com/>

- Wrote an Amazon price tracker using python and selenium web driver to get data of a given product within a given price range.
- Wrote an Amazon clone, displaying the data obtained through the price tracker, with full user-authentication and personal shopping carts, using Firebase, React, Reactstrap and the React-Context-API.
- Learnt React-Context-API to avoid prop drilling; learnt how firebase authentication and firestore database can be used to hold data of each customer.

## EDUCATION

---

### Informatics Institute of Technology

(2019-present)

- Bachelors of Science in Computer Science.
- Cumulative Average: 87%

### Royal Institute International School

(2004-2019)

- AL 2019 – Mathematics: 3A's

## COMPETITIONS

---

### Code Rally Competition

Rank: 2/70 (March 8 2020)

<https://www.hackerrank.com/contests/coderally/leaderboard>

- Code Rally competition held by Informatics Institute of Technology through HackerRank.
- Acquired deep experience in problem solving.

## **Additional Certifications**

- AWS Fundamentals by Amazon Web Services on Coursera. Certificate earned at October 11, 2020
- Deep Learning.AI TensorFlow Developer by Deep Learning.AI on Coursera. Certificate earned at September 25, 2020
- Mathematics for Machine Learning by Imperial College London on Coursera. Certificate earned at September 12, 2020
- Full-Stack Web Development with React by The Hong Kong University of Science and Technology on Coursera. Certificate earned at August 7, 2020.
- Deep Learning by deeplearning.ai on Coursera. Certificate earned at September 2, 2020.
- Java Programming and Software Engineering Fundamentals by Duke University on Coursera. Certificate earned at July 13, 2020.
- Object oriented Programming in Java by University of California San Diego & Duke University on Coursera. Certificate earned at July 16, 2020.
- Web Design for Everybody: Basics of Web Development & Coding by University of Michigan on Coursera. Certificate earned at June 30, 2020.
